## Grant Management Solution

In grants management, it's critical that file processing is quick, accurate, and adaptable to accommodate policy changes. It is imperative that a grants management system is safe and secure yet **flexible** and **customizable** with a fast-paced development capability.

## IEM Offers Leading-Edge Capabilities

IEM's **GrantWise™** supports the efficient and effective business processes and workflow management of grants administration from **initialization to closeout**.

## GrantWise™ Utilizes Advanced Platform Technologies for Grants Management Processing

**GrantWise™**, a low-code solution built on the industry-leading Appian platform, checks all the boxes for grants management processing needs. **GrantWise™** is built for rapid deployment and equips departments to quickly develop and launch tailored end-to-end applications for custom, client-specific functions.

### GrantWise™ Key Features

- Automated workflows with role-based access and task notifications
- Advanced integrations with Robotic Process Automation

## *Monitor & Track Grantee Projects from Start to Finish*

- Manage the full application process
- Log project documentation and collect reports and needed documentation
- Monitor milestones and project scope
- Manage the closeout process

GrantWise™ offers
industry-leading capabilities
for accessing the system
across devices.

## Cost Effective Software Management

IEM delivers **GrantWise™** quickly and efficiently, ensuring that the software an agency purchases is tailored to their unique operating needs for immediate system utilization, delivering 100 percent of the functionality required. While every customer owns the solution and can build or modify applications at the speed of their mission, IEM provides multiple options for supporting the software to future-proof your investment in our solutions.

## About IEM

IEM brings nearly four decades of innovation to solve the most pressing challenges for our clients with a mission to build safe, secure, and resilient communities. We design and deliver software and services to digitally transform agencies with critical, life-saving missions. IEM's combination of experience and digital services empowers our partners to serve their communities in new and innovative ways. Our team has supported agencies at the federal level, in all 50 states and hundreds of localities and urban areas. We deliver consulting services that modernize IT systems, provide actionable data, and optimize workforces.
