

# Resilian™

Planning Management  
Powered by IEM

## A Modern Platform for Modern Emergency Management

Resilian.IQ™ is IEM's next-generation emergency operations planning platform, **built for planners** who manage complex, multi-jurisdiction plans and need a system that keeps pace with real-world demands. Designed by practitioners, powered by AI, and integrated with Microsoft 365, Resilian.IQ™ transforms static planning into a dynamic, collaborative, insight-driven workflow.

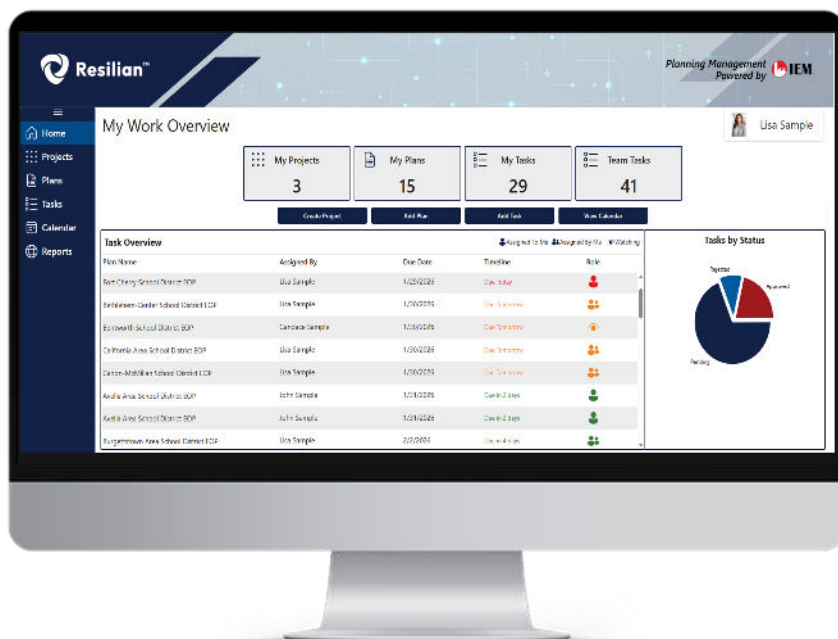

## IEM Offers Leading-Edge Capabilities

Resilian.IQ™ signifies a digital transformation in emergency operations planning. Designed to reduce redundancies and streamline critical processes, Resilian.IQ™ provides planning professionals with essential tools to effectively plan for and respond to real-world challenges, enhancing the efficiency and effectiveness of emergency preparedness efforts.

- **Faster plan development** with AI-generated content and structured workflows
- **Better visibility** into planning progress, compliance, and readiness
- **Stronger collaboration** across teams and jurisdictions
- **Reduced administrative overhead** with automated document handling
- **Improved plan quality** using consistent templates and analytics
- **Secure, cloud-ready architecture** aligned with Microsoft 365 and Power BI

## Key Capabilities

- Automated workflows with role-based access and task notifications
- Seamless integration with external systems and datasets
- AI-generated plans
- Automatic report generation
- Dynamic, customizable dashboards
- Full audit capabilities
- Mobile capabilities
- Rapidly deployable
- Secure cloud infrastructure
- Industry-leading array of security certifications

# What Can Resilian.IQ™ Do for Your Agency?

## Enhanced Collaborative Work Environment

See every plan, project, and task in a single dashboard—across departments, jurisdictions, and planning cycles. Resilian.IQ™ empowers planners and supervisors' instant visibility into what's active, what's pending, and what needs attention.

### Live Compliance & Distribution Analytics

- Resilian.IQ™ integrates seamlessly with Power BI to surface real-time metrics on plan status, completion, distribution, and compliance. Know instantly where gaps exist—and where action is required—before an audit or exercise reveals them.

### Role-Based Access & Secure Collaboration

- Sign in using existing Microsoft 365 credentials for secure, role-appropriate access. Collaborate confidently with internal teams, partner agencies, and leadership—all in an environment aligned with your organization's security posture.

## Reduce Inefficiency with AI Accelerated Planning

Generate plan content, update sections, and produce structured planning documents using IEM's proprietary AI tools—now natively integrated into the Resilian.IQ™ experience. Build higher quality plans in a fraction of the time, with outputs grounded in authoritative templates and planning best practices.

### Enterprise Ready for Government

From statewide deployments to local emergency management offices, Resilian.IQ™ is built to support:

- Complex governance structures
- Multi-agency planning workflows
- Distributed review cycles
- Audit-ready documentation trails

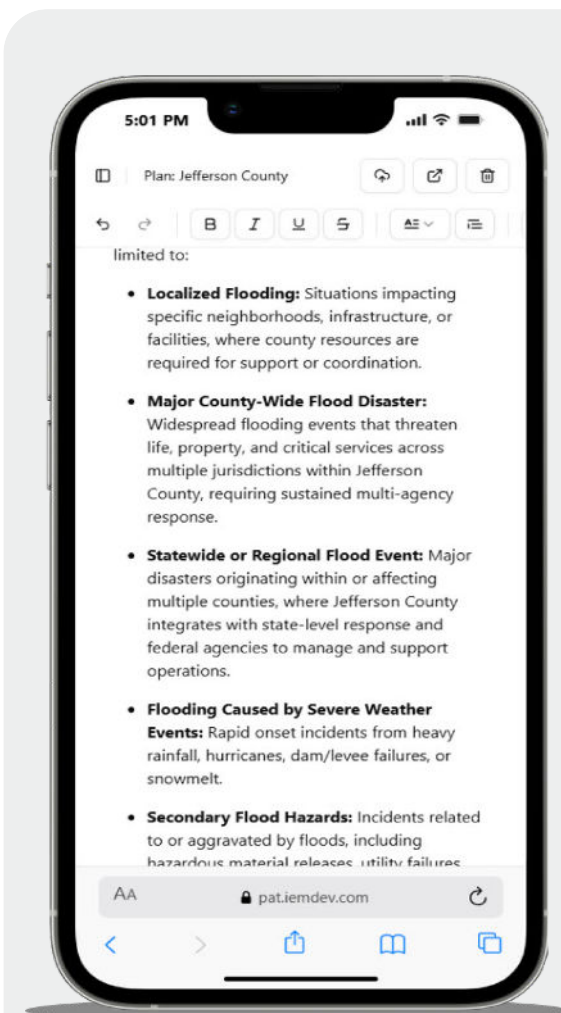

## Built for the Way Planners Actually Work

Upload, view, and manage Geospatial Information System (GIS) files, maps, shapefiles, Word documents, PDFs, PowerPoint decks, and spreadsheets directly inside the application. No formatting hassles, no file type limitations—just clean, planner-friendly workflows. Resilian.IQ™ is flexible across planning missions, including:

- Emergency Operations Plans (EOP)
- Hazard Mitigation Plans
- Emergency Support Function (ESF) annexes
- Continuity of Operations (COOP)
- Multi-jurisdiction regional plans

## About IEM

IEM brings four decades of innovation to solve the most pressing challenges for our clients with a mission to build safe, secure, and resilient communities. We design and deliver software and services to digitally transform agencies with critical, life-saving missions. We deliver consulting services that modernize IT systems, provide actionable data, and optimize workforces.

*Resilian.IQ™ offers industry-leading capabilities for accessing the system across devices.*
